~~DEFINITION~~

Election/Restrictions

1. Applicants' election of Group II-A, Claims 10-19, and cancellation of Claims 1-9 and 24-30 without traverse, filed on 11/25/05 is acknowledged.

Since Applicants' Amendment (filed 11/25/05) has added new claims (Claims 31-48), which then necessitate new ground of Restriction presented in this Office action.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 10-19 & 31-39, drawn to an apparatus for making a conductive circuit, classified in class 29, subclass 749;
 - II. Claims 40-48, drawn to an alternative apparatus for making a conductive circuit, classified in class 29, subclass 745.

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as

claimed because the apparatus for making a conductive circuit as recited in Group II does not require non-insulative material thereof, as required by Group I. The subcombination, Invention I, has separate utility such as separating a conductive material within some indentations from the conductive material within some other indentations by non-insulative material.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. A telephone call was made to the office of Richard E. Billion (612-373-6977) on 1/19/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
